SKILLS

BACKEND

NestJS Express.js Node.js

Laravel PHP(OOP)

FRONTEND

Next.js React.js TypeScript

Tailwind.css Bootstrap

DATABASE

PostgreSQL MySQL

MongoDB Redis DynamoDB

CLOUD & DEVOPS

Git Docker CI/CD K8s

AWS Bash & Prompt Scripting

INTEGRATIONS

Stripe Twilio Firebase

SSLCOMMERZ bKash

SurjoPay SonaliPay Resend

Algolia Sentry Dozzle

EDUCATION

B.Sc. in Computer Science & Engineering

Pabna University of Science & Technology, Pabna

Passing Year: 2020

CGPA: 3.61 out of 4.00

PUBLICATION

Hybrid Feature Vector Space-Based Ensemble Machine Learning Approach For Sentiment Analysis

ICCIT-2021, Bangladesh

★ Dr. Fatema Rashid Best Paper Award, 2021

SUMMARY

Passionate Full-Stack Software Engineer with 5+ years of experience designing and building scalable, high-performance web applications across diverse domains. I specialize in backend architecture and modern frontend development, delivering robust solutions for Multi-tenant and enterprise environments. Driven by clean architecture, security, and engineering excellence to build systems that make a real impact.

EXPERIENCE

• Software Engineer | Cloudly Infotech Ltd.

Feb 2022 - Present

◆ Instacircle - Community Management Platform

- Developed high-performance backend RESTful APIs for a multi-tenant community management platform
- Built features including member registration, membership subscription, event management, fundraising, job posting, live streaming, billing system and bulk data handling
- Managed cloud infrastructure with Docker, Kubernetes and CI/CD pipelines on AWS
- Integrated Stripe, Twilio, SSLCommerz, Resend and Firebase; monitored activity logs and performance via Dozzle

NestJS PostgreSQL Redis React TypeScript Tailwind CSS AWS S3 SQS Lambda DynamoDB SaaS

◆ JEXCA - Alumni Management System

- Built core features including user registration, event management, e-voting system, help-seeking posts, package subscription and billing system
- Implemented role-based access control and deployed on AWS EC2, Amazon RDS and S3 for reliable infrastructure
- Integrated Stripe, Twilio, SurjoPay, bKash and Firebase; tracked errors and performance via Sentry

Laravel MySQL Redis JavaScript jQuery Bootstrap AWS S3

◆ Laneway - Education Management System

- Developed student registration, course management, session-wise enrollment, billing and document management
- Deployed on AWS EC2, Amazon RDS and S3; monitored activity logs and performance consistency via Sentry

Laravel MySQL JavaScript jQuery Bootstrap AWS S3

• Software Engineer | Freelancing

Jan 2021 - Present

◆ BKMEA - Document Management Platform

- Built modules for member registration, machinery certificate tracking, fire certificate tracking, attachment management, payment processing, and reporting
- Developed secure, scalable, high-performance RESTful APIs for document and file sharing between BKMEA and BSW with actionable workflows
- Integrated Sonali Pay, SSLCommerz, and Firebase; monitored errors and performance via Laravel Log Channels

Laravel MySQL JavaScript jQuery Bootstrap

◆ BTI SFS - Real Estate Automation Solution

- Designed and developed secure, scalable, high-performance RESTful APIs
- Built features including project onboarding, design consultancy management (2D, 3D, WD), consultancy-wise payment collection, design documentation, and reporting. Integrated real-time Firebase notification system

Laravel MySQL React TypeScript Tailwind CSS

◆ Shadibari - Matrimonial Website

- Designed and built biodata registration, matchmaking, proposal management, package-based access control, and payment processing modules
- Integrated manual payment solutions; monitored errors and performance via Laravel Log Channels
- Managed on-premises server infrastructure using cPanel

Laravel MySQL Inertia.js with Vue Tailwind CSS

• Junior Software Engineer | Logic Infotech Ltd.

Sep 2020 - Feb 2022

◆ Hospital Management System

- Built a scalable LAN-based application spanning multiple hospitals connected through a centralized server
- Developed modules for patient registration, doctor appointments, prescriptions, pharmacy store management, payment collection, and diagnostics automation
- Integrated with pathology and radiology equipment to automate diagnostic test reports

Laravel Oracle JavaScript jQuery Bootstrap

◆ Document Management System

- Developed secure file and folder creation, permission-based sharing, file syncing and role-based access control
- Deployed on on-premises server infrastructure for scalable and secure storage management

Laravel MySQL Vue.js Vuex Vue Router Bootstrap

◆ Bangladesh Lions Foundation Website

- Built an online portal for patient appointment booking, doctor scheduling and doctor search by specialty
- Developed services listing and medical information pages to help patients easily find and connect with doctors

Laravel MySQL JavaScript jQuery Bootstrap

KEY ACHIEVEMENTS

Multi-tenant SaaS
High-volume daily API requests

CI/CD Automation
Docker, K8s & GitHub Actions

20+ Projects
Across 5+ business domains

Award-Winning
Best Paper at ICCIT-2021
