Dear Hiring Manager,

I'm excited to apply for the Software Engineer II (Backend) position at your company. I have over 5 years of experience building scalable web applications using NestJS, Node.js, Laravel, React, and TypeScript.

In my current role, I work on multi-tenant SaaS platforms where I design backend APIs, manage cloud infrastructure on AWS, and integrate services like Stripe, Firebase, and payment gateways. I enjoy solving real-world problems, writing clean and maintainable code, and building systems that are reliable and secure.

I'm passionate about continuous learning and always look for better architectural and performance improvements in the systems I build. I would love the opportunity to contribute my skills and grow with your team.

Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,
Md. Nazmul Islam
