SUMMARY

Accomplished Full-Stack Software Engineer with 5+ years of experience delivering production-grade systems across enterprise, SaaS, and startup environments. Specializing in the MERN stack and beyond, recognized for translating complex, ambiguous business requirements into clean, scalable architectures, such as multi-tenant platforms, compliance-driven workflows, and real-time systems across healthcare, real estate, education, and fintech. Equally at home driving technical decisions end-to-end and collaborating closely with cross-functional teams to ship reliable software on time. Award-winning published researcher with a consistent record of engineering outcomes that matter.

EXPERIENCE

Cloudly Infotech Ltd.

February 2022 – Present

Software Engineer

Instacircle — Multi-Tenant Community Management SaaS Platform

- Architected high-performance RESTful APIs for a multi-tenant platform supporting member registration, subscription management, event coordination, fundraising, job postings, and live streaming.
- Designed billing engine and bulk data processing pipelines; managed containerized cloud infrastructure using Docker, Kubernetes, CI/CD pipelines and AWS.
- Integrated Stripe, Twilio, SSLCommerz, Resend, and Firebase; implemented activity monitoring and log aggregation via Dozzle.

NestJS · PostgreSQL · Redis · React · TypeScript · Tailwind CSS · AWS (S3, SQS, Lambda, DynamoDB) · Docker · Kubernetes

JEXCA — Alumni Management System

- Built user registration, event management, e-voting, help-seeking posts, package subscriptions, and full billing workflow from scratch.
- Implemented granular role-based access control and deployed on AWS EC2, Amazon RDS, and S3.
- Integrated Stripe, Twilio, SurjoPay, bKash, and Firebase; tracked errors and performance via Sentry.

Laravel · MySQL · Redis · JavaScript · jQuery · Bootstrap · AWS S3

Laneway — Education Management System

- Developed student registration, course management, session-wise enrollment, billing, and document management modules.
- Deployed on AWS EC2, Amazon RDS, and S3; monitored application health via Sentry.

Laravel · MySQL · JavaScript · jQuery · Bootstrap · AWS S3

Freelance Software Engineering

January 2021 – Present

Independent Consultant

BKMEA — Document Management & Compliance Platform

- Built member registration, machinery and fire certificate tracking, attachment management, payment processing, and reporting modules.
- Developed secure RESTful APIs for cross-organization document sharing between BKMEA and BSW with structured approval workflows.
- Integrated SonaliPay and SSLCommerz; monitored errors via Laravel Log Channels.

Laravel · MySQL · JavaScript · jQuery · Bootstrap · Firebase

BTI SFS — Real Estate Process Automation

- Designed and built scalable RESTful APIs for real estate project onboarding and design consultancy workflows (2D, 3D, WD).
- Developed consultancy-wise payment collection, design documentation, reporting, and real-time Firebase notification system.

Laravel · MySQL · React · TypeScript · Tailwind CSS · Firebase

Shadibari — *Matrimonial Web Platform*

- Built biodata registration, matchmaking, proposal management, package-based access control, and payment processing modules.
- Managed on-premises server infrastructure using cPanel; monitored errors via Laravel Log Channels.

Laravel · MySQL · Inertia.js · Vue.js · Tailwind CSS

Logic Infotech Ltd.

September 2020 – February 2022

Junior Software Engineer

Hospital Management System — *Multi-Site Healthcare Platform*

- Built a scalable LAN-based application connecting multiple hospitals through a centralized server to support continuous clinical operations.
- Developed patient registration, doctor scheduling, prescriptions, pharmacy management, payment collection, and diagnostics modules.
- Integrated with pathology and radiology equipment to automate diagnostic report generation.

Laravel · Oracle · JavaScript · jQuery · Bootstrap

Document Management System

- Developed secure file and folder creation, permission-based sharing, file syncing, and role-based access control on on-premises infrastructure.

Laravel · MySQL · Vue.js · Vuex · Vue Router · Bootstrap

Bangladesh Lions Foundation Website

- Built patient appointment booking, doctor scheduling, specialty-based doctor search, and medical information pages.

Laravel · MySQL · JavaScript · jQuery · Bootstrap

TECHNICAL SKILLS

Backend: NestJS, Express.js, Node.js, Laravel, PHP (OOP)

Frontend: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Bootstrap

Databases: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB

Cloud & DevOps: AWS (EC2, RDS, S3, SQS, Lambda), Docker, Kubernetes, GitHub Actions, Jenkins, CI/CD, Bash scripting

Integrations: Stripe, Twilio, Firebase, SSLCommerz, bKash, SurjoPay, SonaliPay, Resend, Algolia, Sentry

Architecture: RESTful APIs, Multi-Tenant SaaS, Role-Based Access Control, Event-Driven Systems, Microservices

EDUCATION

B.Sc. in Computer Science & Engineering

2016 – 2020

Pabna University of Science & Technology, Pabna, Bangladesh

CGPA: 3.61 / 4.00

PUBLICATION

Hybrid Feature Vector Space-Based Ensemble Machine Learning Approach for Sentiment Analysis

IEEE International Conference on Computer and Information Technology (ICCIT), Bangladesh, 2021

★ **Dr. Fatema Rashid Best Paper Award, 2021**
